## Summary

---

Junior Frontend Developer with over a year of hands-on experience building responsive, modern web applications in React, Next.js, and TypeScript. Comfortable integrating REST APIs, Firebase cloud services, and client-side state management to ship interactive, user-focused interfaces. Recent work includes an AI-powered skin analysis platform built with Next.js and the OpenAI Vision API, plus a React and Firebase NFT marketplace. Fluent across the frontend workflow, from component architecture and responsive styling with Tailwind CSS to Git-based collaboration and deployment on Vercel.

## Experience

---

**Skinstric AI (Remote)** Sep 2025 - Apr 2026

*Frontend Developer*

- Architected an AI-powered skin analysis platform in Next.js, integrating the OpenAI Vision API for real-time image analysis and personalised skincare insights.
- Optimised performance using Next.js Server Components and Lottie animations, achieving sub-2-second analysis times.
- Built a modular component system with GSAP-driven visual feedback, improving UI consistency and user engagement.

**CVS Pharmacy (Los Angeles, CA)** May 2024 - Present

*Licensed Pharmacy Technician*

- Standardised a dual-register checkout system that cut customer service time by 50%, showing the process focus and attention to detail that carry into building reliable interfaces.

**T-Mobile (Los Angeles, CA)** Feb 2023 - Feb 2024

*Mobile Expert*

- Advised customers on technical products through consultative, needs-based conversations, strengthening the communication skills valued on cross-functional product teams.

## Projects
